

MONITORING PLAN

Forest areas involved:

Plan prepared by:

Date:

Why do you want to monitor?

Broad objective: (generalist surveillance, specialist surveillance, conservation outcome, operational monitoring)

Monitoring questions

Precision required

Indicators and measurement

Indicators

Measurement methods

Measurement protocol

Design

How will change be examined? (BACI (before-after, control-impact), treatment and non-treatment areas, etc)

Marked or unmarked plots?

Sample size

Sample selection (systematic, random, stratification, etc – explain field layout)

Field trial of design

Fieldwork

Fieldwork

Timing

Resources

Particular requirements

Analysis and data storage

Proposed analysis

Proposed storage of records
